Classroom Arrangements and Changes

JOGES

All of the 1st grade is able to fit into one classroom. If we enroll one more student we will need to split that class into two rooms. The kindergarten is split into two classrooms, 9 students in each room. We will be able to enroll 2-3 more students in Kindergarten with out splitting into a 3rd room.

ZLES

The 20 third graders moved their classroom to the gym. We could enroll 3 more students and still be able to fit them in the gym. The 4 grade fits into one room. We could take 3 more students in the 4th grade. The 5th grade fits into one room. If we enroll one more student we will need to split that class. Recently the 2nd grade moved to ZLES into the room that was previously occupied by the third grade. They would be able to enroll 3 more third graders in that room.

GMSHS

The 43 sixth through eighth graders are split into two groups and are seated in the gym. Two teachers instruct those two groups. The juniors are too many to fit in a classroom so we turned the commons into a classroom. The 9th, 10th and 12th graders each fit into a classroom. The 12th graders will have to split if we enroll one more students in that grade. We will need some duct tape and MacGyver to figure that problem out.
