

## STUDENT DIRECTIONS FOR SETTING UP THE KUSPUK GOOGLE MAIL CLIENT

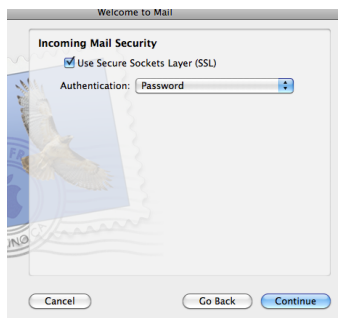

1) email address and password

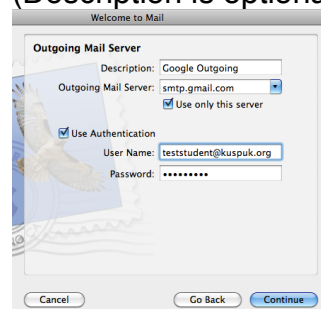

2) Incoming server: imap.gmail.com  
Use WHOLE email address as username  
(Description is optional)

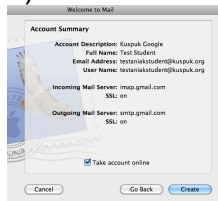

3) Confirm SSL & password auth.

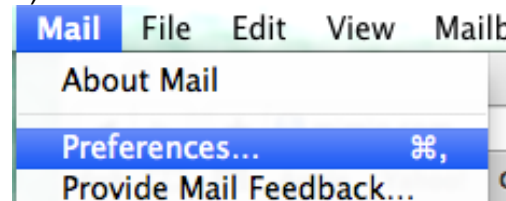

4) Outgoing server is smtp.gmail.com  
(Description is optional)

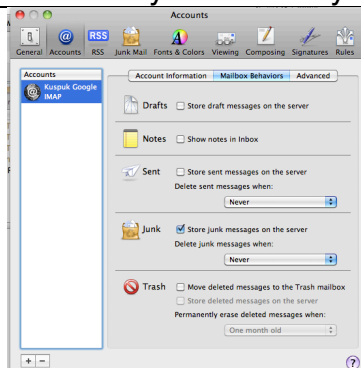

5) Confirm

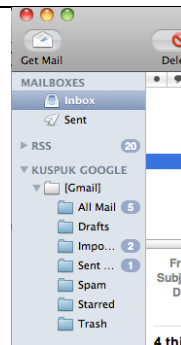

6) Go to Mail menu → Preference

7) Suggestion: Click on Accounts tab – then Mailbox behaviors.  
Match these settings (Sent mail will already be saved by Google)

8) Wait for Kuspuk Google to show up.  
expand Gmail folder if you'd like.

If there was a mistake in setup, it's usually easier to delete the account and start again. Go to Mail Preferences → Accounts and click the minus sign near bottom.
