

## School board report for Aniak schools for November 2020

Submitted by Gretchen Kelly, Principal

For in-person learning in Aniak schools, staff and students were following protocols and procedures consistently.

There have been no reports of bullying in Aniak schools, and we have had very few student suspensions to date.

Staff had some PLC training on teaching writing and also some classroom management techniques. We recently had training from Julia Boynton on how to make teaching videos. Thank you Julia it was well put together.

Materials for our second literacy night were sent home the last week of November.

Both Aniak schools recently received their new technology. Teachers are working on learning how to utilize the technology for distance learning delivery and we expect to send technology that is not internet dependent out to students next week to help address student needs during this longer school lock down time period.
