

MKEA “Highlighting” October 10

MKEA

On September 23, Jasmine Williams attended an all day NEA Rural Alaska Presidents Training in Anchorage. She joined about 20 others, where they reviewed Presidential responsibilities, member benefits, and negotiation procedures. It was a great experience! Jasmine met several teachers that love working with the children in rural Alaska just like we do in KSD. She had the chance to speak with our Regions representatives on the NEA-AK board. From this training and several others, we hope to keep a respectful and peaceful working partnership with the administration of our school district. We are all here to help students grow, learn, and achieve.

Aniak Jr./Sr. Highschool

7th graders have an Art elective this year

This week in Mr. Heerdt’s class - student were to create their own superhero or supervillian and then create a comic book about them. The students were creative and we have everything from Captain Alaska to Doctor Jellyfish.

AMNES

Students in Ms. Boynton’s class will be using a Rain Gauge to measure precipitation this school year. The rain gauge is located at the AMNES playground. Students will be using it daily to measure precipitation. The students will be reading the gauge and will be submitting their measurements to the CoCoRaHs website. The website is a national database for measuring precipitation. Throughout the school year students will be making charts and graphs based on the data.
