

School Board Report

Kalskag Principal - Severin Gardner

December 2017

JOGES

JOGES students are preparing for their Christmas program on December 12th. Each class is working on something special to present. Students from JOGES created some great Thanksgiving art projects to take home for the long weekend. I had the pleasure of having two of the projects hanging in my house. Gobble Gobble. JOGES students are also tutoring 3 days a week.

ZLES

The little Grizzly wrestlers had a great showing at the Gladys Jung invitational last weekend. Halle Littlefish wrestled her way to a 1st place finish. Francine Heckman ended up taking third. Riley Kerr took 6th. All these wrestlers were first year wrestlers and worked hard through out the season with a big pay off at the end of the year. Daniel Isaac coached them. Daniel has been coaching for 3 years for grade 4-6. We have 2 Battle of the Books teams that are preparing for the upcoming battles. With some scheduling conflicts and unforeseen circumstances we were able to get in a practice battle with other district teams. Patricia Gardner and Quana Holmberg are coaching the ZLES students in Battle of the Books. Students at ZLES have opportunities to tutor 4 days a week. With Mrs. Holmberg, Mr. Scott and Ms. Macy.

GMSHS

The Junior high Grizzly wrestlers also had a great showing, Mika Levi and Elizabeth Wooten took first place in their weight classes. Mika finished the year with a first and a second place finish. Elizabeth finished the year with a first and a fifth place finish. Kalskag's volleyball team took second and regionals and brought home the sportsmanship award. Kalskag battled back to the championship after an early loss to Akiak. After beating Holy Cross, Akiak and Akiachak they eventually lost to Aniak who qualified for state for the second consecutive season.

Students at GMSHS are completing the final benchmark STAR assessments in reading and math. Students have opportunities to tutor 4 days a week after school. With basketball starting up and the weather getting cold the year is almost half over. With the ice setting in, Mr. Dammeyer's ice recording project has started. His class will be collecting data every week to measure the ice thickness and other data through out the year.
