

MKEA “Highlighting”

December 12, 2017

MKEA

MKEA sent members to a bargaining training conference in November. The team was able learn valuable skills for bargaining that will meet the best interests of both teachers and the district.

ZLES

ZLES students were successful on and off the mat in Bethel with their sportsmanship and behavior in addition to various students bringing home medals. Over two dozen participants took part in KLG's first open ski of the year. Pleased with the growth students are showing since the start of the year.

CVSS

Every Upriver school except Stony River visited Chuathbaluk for the Upriver Science Fair. Stony River still submitted science fair projects. The theme was Health. Students made first aid kits, discussed cold weather safety, blood pressure, dental health, and healthy eating habits. Thursday evening we had a science experiment galley open to the community. We had a great turn out and students got to discuss their projects and answer questions. YKHC donated hoodies and water bottles. Below is a copy of the winners.

Below is a copy of the winners

4th Grade

1st place – Kiley Hayden - SLQ

“Effects of a High Sugar Diet on Blood Sugar Levels”

2nd place- Kayla Effemka - SLQ

“A Smoker’s Lungs”

3rd place - Rasaun Stern-Morgan - SLQ

“Lemon Juice Battery”

AMNES

Reading Buddies from Ms. Boynton's 5th/6th grade and Ms. Emerie's K-1st grade participated in a VTC session with the Alaska Sea Life Center. Students learned about marine mammals and their special adaptations that help keep them warm. At the end of the session students were able to make their own clay sea lions to take home.
